LABORATORY - REPORT

APPLICANT:

EB BRANDS (HK)

ADDRESS:

Unit 705 & 706, Enterprise Square, Phase 1

Tower III, 9 Sheung Yuet Road

Kowloon Bay, Kowloon

Hong Kong

DATE OF SAMPLE RECEIVED:

2011-09-21

DATE OF TESTING:

2011-09-27 to 2011-09-28

DESCRIPTION OF SAMPLE:

Product:

Micro Big Rig Fueler

Model number:

6373

Additional Model number:

6372

(T)

(The vehicle of models 6373 and 6372 are identical in circuit and PCB

layout. The differences are styles and color.)

Product class:

Low Power Communication Device – Receiver (49 MHz)

FCC ID number:

XRB6373YE49RX

Rating:

DC 1.5V (AA size battery x 1)

CONDITION OF TEST SAMPLE:

The received sample was under good condition.

INVESTIGATIONS

REQUESTED:

Measurements to the relevant clauses of F.C.C. Rules and Regulations Part

15 Subpart B - Unintentional Radiators.

RESULTS:

See the attached sheets.

CONCLUSIONS:

From the measurement data obtained, the tested sample was considered to have COMPLIED with the requirements for the relevant clauses of Federal

ELECTRICAL CERTIFICAT

Communications Commission Rules as specified above.

Stephen C.N. Wong Technical Manager

Conducted Emission Test Setup

LEGEND:

- Interconnecting cables that hang closer than 40 cm to the groundplane shall be folded back and forth in the center forming a bundle 30 to 40 cm long (see 6.1.4 and 11.2.4).
- I/O cables that are not connected to a peripheral shall be bundled in the center. The end of the cable may be terminated, if required, using the correct terminating impedance. The overall length shall not exceed 1 m (see 6.1.4).
- 3) EUT connected to one LISN. Unused LISN measuring port connectors shall be terminated in 50 Ω . LISN can be placed on top of, or immediately beneath, reference groundplane (see 5.2.3 and 7.2.1).
 - 3.1) All other equipment powered from additional LISN(s).
 - 3.2) Multiple outlet strip can be used for multiple power cords of non-EUT equipment.
 - 3.3) LISN at least 80 cm from nearest part of EUT chassis.
- 4) Cables of hand-operated devices, such as keyboards, mice, etc., shall be placed as for normal use (See 6.2.1.3 and 11.2.4).
- Non-EUT components of EUT system being tested (see also Figure 13).
- Rear of EUT, including peripherals, shall all be aligned and flush with rear of tabletop (see 6.2.1.1 and 6.2.1.2).
- Rear of tabletop shall be 40 cm removed from a vertical conducting plane that is bonded to the groundplane (see 5.2.2 for options).

FCC - Test Report

No. 55820-2

Date: 2011-10-07 Page 7 of 12

Test Procedure

Radiated Emission:

The EUT was tested according to ANSI 63.4-2003 for the requirements of FCC Part 15 Subpart B Section 15.109.

During the test, the sample was placed on a turn table and operated with new battery. The table is 0.8 meter above the reference ground plane on the Open Aera Test Site and can rotate 360 degrees to determine the position of the maximum emission level. A broad-band antenna for the frequency range 30 - 1000 MHz, connected with 10 meters coaxial cable to the test receiver was used for measurement. The antenna is capable of measuring both horizontal and vertical polarizations. The antenna was raised from 1 to 4 meters to find out the maximum emission level from the EUT.

An initial pre-scan was performed to find out the maximum emission level of the sample placed at 3 orthogonal planes. Final measurement (30 MHz -1000 MHz) was then performed to record the data for the emissions under worst-case condition for combination of the antenna orientation / height and turn table position.

Note: The Open Aera Test Site located at IECC was placed on file with the FCC Pursuant to Section 2.948 of the FCC Rules (FCC Registration No.: 97774).

Cohere Plot at fundamental frequency

Superregenerative Receiver: According to ANSI C63.4-2003 clause 12.1.1.1, a singal generator was set to the unit under test operating frequency. An un-modulated continuous wave (CW) signal was radiated at the super-regenerative receiver operating frequency to cohere the characteristic broadband emissions from the receiver.

Sample location: Less than 0.5m from the measuring antenna

Applied signal: - 60dBm (non-modulated, 49.86 MHz)

Remark: Self-cohere

All emissions observed complies with FCC limits.
